[From page 5 of comments:]

Fairfax County Privacy Council Supports these proposals but recommends that a date of birth be redefined as a full date of birth at Va. Code § 59.1-443.1(A)(i).

I pose the question - what problem are we trying to fix here? Have there been complaints - I served on the identity theft task force with Attorney General Kilgore and never once did we hear of someone taking information off the check (that wasn't already preprinted on the check). Why don't you restrict the consumers from having their Social Security number printed on their checks???

This unnecessarily restricts retailers ability to business in the Commonwealth.

[Comments edited by JCOTS staff due to submission's length; every attempt has been made to include all specific comments regarding the draft legislation in question.]

First, the proposal would prohibit a bank from printing bank account numbers on checks drawn on the bank. ... Moreover, banks would be precluded from recording account numbers on counter checks.

[The bill does not prohibit the bank from printing information on a check because it is not accepting checks and is not accepting it for the transaction of business.]

Second, the proposal would restrict the use of fingerprints and biometric data in connection with accepting checks.

[The bill does not prohibit the bank from printing information on a check because it is not accepting checks and is not accepting it for the transaction of business. Also, this bill only prohibits recording the information on the check itself once accepted.]
