

# Storm Ready Wi-Fi Is Here!

Quick and  
Easy setup

Xfinity Battery  
Backup Included

Automatic  
connection

Extended  
WiFi coverage

Real-time  
network updates

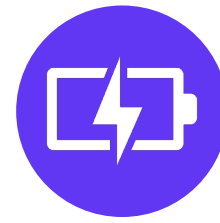

# How Storm-Ready Wi-Fi works

## Network Outage: WiFi Extender and Gateway LTE Backup

Storm-Ready WiFi provides LTE internet connection to the Gateway.

Xfinity Gateway, Storm-Ready device and 2nd Gen xFi Pods continue to provide whole home WiFi coverage.

## Power Outage: Whole home Gateway with LTE Backup

Xfinity Gateway and Pods are down due to a power outage.

Storm-Ready WiFi becomes the home WiFi Gateway using the LTE internet connection and battery backup.

## Normal Network Operation: WiFi Extender

When there are no outages, the Storm-Ready device acts as a WiFi extender.

It works with the Xfinity Gateway and 2nd Gen pods to provide complete home WiFi coverage.
