CDC Officially Admits People With HIV Who Are Undetectable Can't Transmit HIV

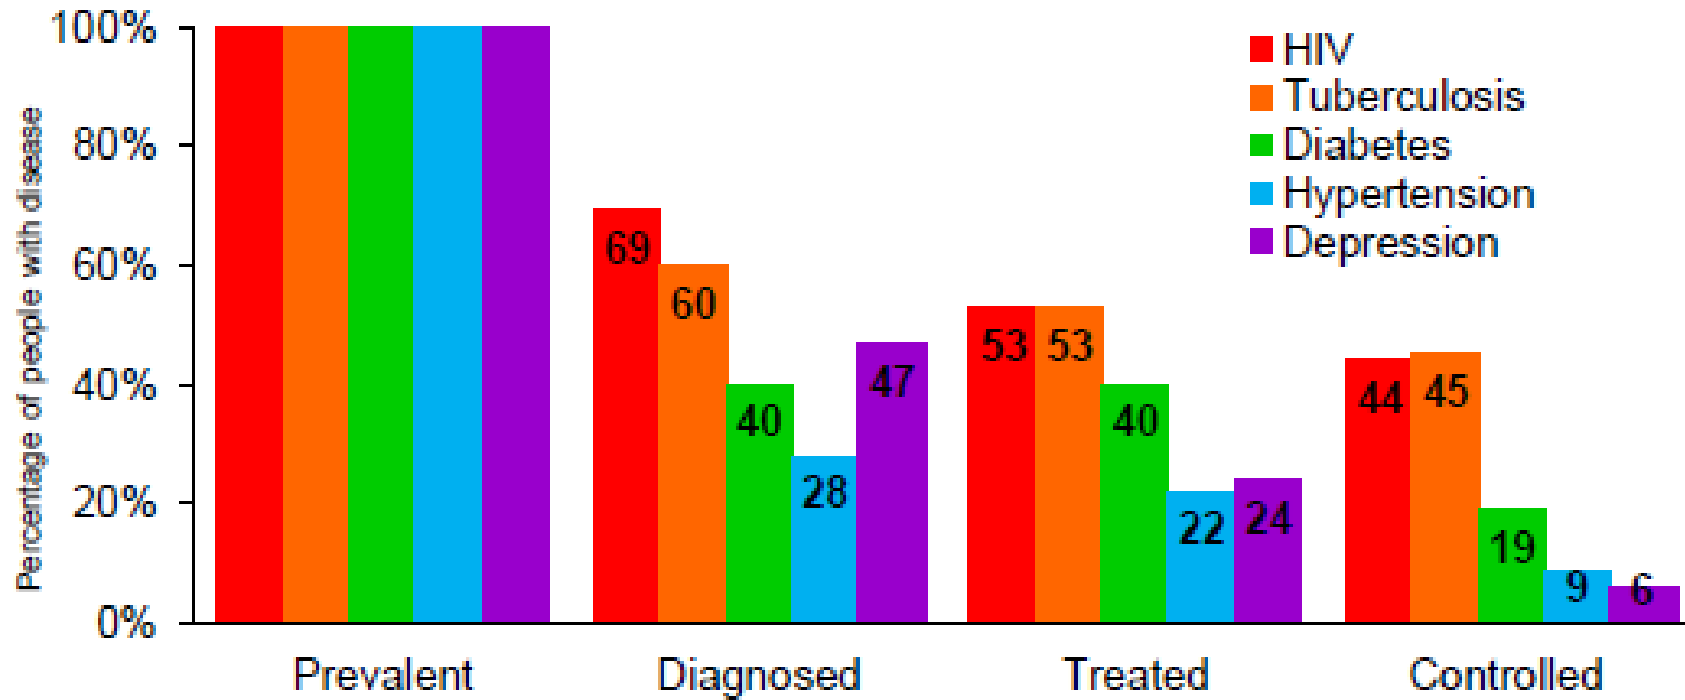

In a historic letter, the Centers for Disease Control and Prevention support the science behind "Undetectable Equals Untransmittable."

Engagement in Care

Care Cascades must be improved

Hyle E, IAC 2018.

Difference in Viral Suppression by Race

For every 100 **American Indian/Alaska Native** people with diagnosed HIV:

For every 100 **Asian** people with diagnosed HIV:

For every 100 **Black/African American** people with diagnosed HIV: †

For every 100 **Hispanic/Latino** people with diagnosed HIV: †

For every 100 **Native Hawaiian and other Pacific Islander** people with diagnosed HIV:

For every 100 **White** people with diagnosed HIV:

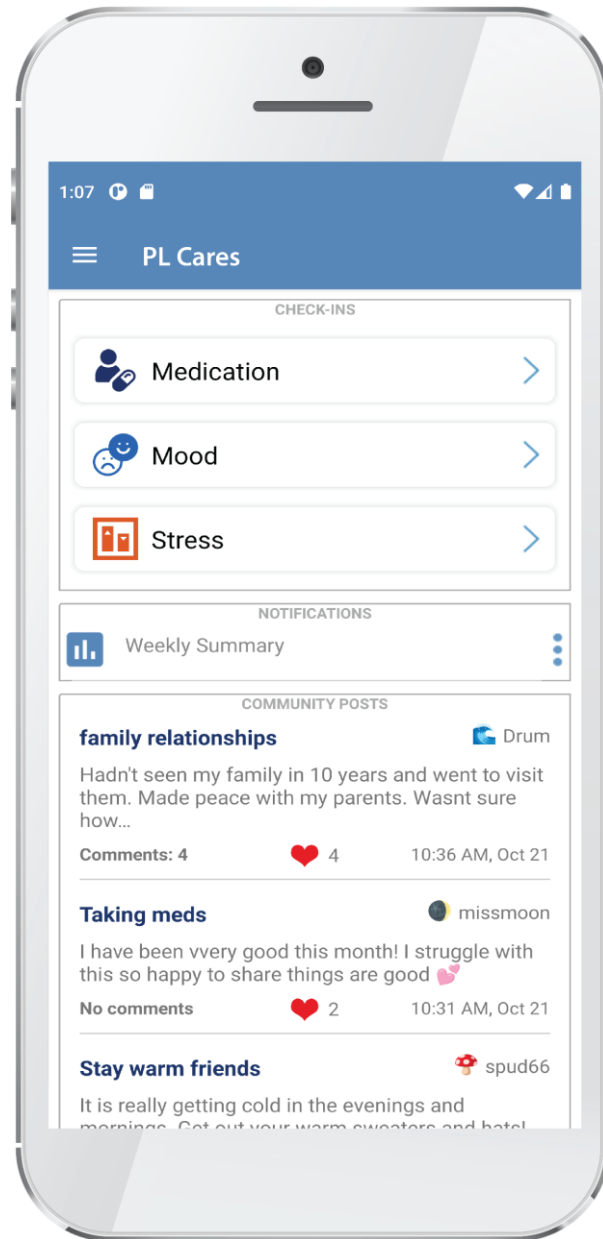

For every 100 **multiracial** people with diagnosed HIV:

For comparison, for every **100 people overall** with diagnosed HIV, **75** received some care, **54** were retained in care, and **66** were virally suppressed.

What is PL?

PositiveLinks/PlusLiving/PL Cares:

- Care-site centered engagement in care program that employs a digital health platform developed to support people with HIV reach their care goals.
- Integrated solution comprised of a tailored patient-facing smartphone app and a secure web portal.
- The patient-facing app contains tools that support care coordination, self-care monitoring, and access to social support.

PL Program 24-Month Outcomes

Baseline

60% virally suppressed

60% engaged in care

Higher PL usage was associated with a greater likelihood of achieving viral suppression and retention in care

24 Months with PL

88% virally suppressed

89% engaged in care
