

SUMMARY

Urban development areas. Authorizes a locality to refer to an "urban development area" by another term. The bill also requires a planning district commission to provide to member localities demographic, economic, and other data concerning its region and member localities as is necessary for such localities' designations of urban development areas. The bill also relieves a locality that would be required to designate an urban development area from making such designation if the locality determines that its comprehensive plan accommodates growth in a manner consistent with the provisions of the bill and adopts a resolution describing such accommodation.
