

## **Possible Subcommittees**

*Submitted by: Peter Blake*

1. Subcommittee to engage directly with institutions who have been involved in activities relevant to the Commission. This subcommittee can develop questions to ascertain the level of involvement of these institutions in the relevant activities, and decide which institutions to invite to speak at full Commission meetings.
2. Subcommittee involved with general research oversight--to gather factual information on not just institutional activities, but activities by state and local governments, and other entities. This may require outside professional help.
3. Subcommittee who will address the question of appropriate compensation or relief.
